## DETAILED ACTION

### *Claim Rejections - 35 USC § 112*

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

1. Claims 1-10 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

Regarding claims 1 and 3, line 7, "separation surface" was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Therefore, it is unclear of the configuration or what is being claimed. Claims 2 and 4-10 are rejected based upon the rejected base claims.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 12 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Art Unit: 2873

Regarding claim 12, the phrase “the light-shielding film forming pole-like spacers” renders the claim indefinite. It is unclear how the light-shielding film can “form” pole-like spacers. The rejection below is based on the absence of such limitation or the broadest interpretation.

### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claim 12 is rejected under 35 U.S.C. 103(a) as being unpatentable over Shuichi (Japan Patent Publication 2001) in view of Adachi et al. (US Patent 5,155,612).

Regarding claim 12, Shuichi (figure 1) is interpreted as disclosing an electro-optical device comprising a TFT array substrate **20**, a counter substrate **10**, pixel electrodes **201** formed on the TFT array substrate, a counter electrode **101** formed on the counter substrate, an electro-optical substance **30** held between the TFT array substrate and the counter substrate, a light-shielding film **40** (figure 10, paragraph 0062), pole-like spacers **202** arranged along gaps among the pixel electrodes. Shuichi is interpreted as disclosing all the claimed limitations except that the light-shielding film is formed between the counter substrate and the counter electrode. Within the same field of endeavor, Adachi is interpreted as disclosing this teaching (figure 12; col. 1, lines 21-31). Therefore, it would have been obvious to one of ordinary skill in the art at

Art Unit: 2873

the time the invention was made to form the light-shielding film between the counter substrate and the counter electrode for the purpose of blocking light to unwanted portion of the device.

*Response to Arguments*

4. Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection.

*Conclusion*

5. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
